The Soulful Strings: Sitar and Veena

Two magnificent instruments that have shaped the soul of Indian classical music for centuries

Made with GAMMA

Guardians of Musical Heritage

Indian classical music is a treasure trove of melodic expression, and the sitar and veena stand as two of its most celebrated instruments. Each possesses a unique voice, yet both share the common purpose of bringing ragas to life with emotional depth and technical brilliance.

Their strings have echoed through royal courts, temples, and concert halls, carrying forward centuries of musical tradition.

Journey Through Time

1

Vedic Era

Ancient roots in the veena's predecessor mentioned in sacred texts

2

Medieval Period

Sitar emerges, influenced by Persian instruments brought by Islamic rulers

3

Mughal Courts

Both instruments flourish under royal patronage, reaching artistic heights

4

Modern Era

Global recognition through legendary maestros and cross-cultural collaborations

Made with GAMMA

The Sitar

Northern Heritage

Developed in North India, influenced by Persian and Indian traditions

18–20 Strings

Playing strings, sympathetic strings, and drone strings create resonant depth

Movable Frets

Allows precise tuning adjustments for different ragas and scales

Meend Technique

Signature gliding between notes creates the instrument's distinctive voice

Made with GAMMA

The Veena

South Indian Grandeur

The veena represents the classical music tradition of South India, with origins tracing back thousands of years. Its resonant tone and precise articulation have made it the queen of Carnatic music.

- 7 strings provide melodic and drone capabilities
- Fixed frets ensure perfect intonation
- Masterful gamakas express emotional nuances
- Solid wood construction creates warm timbre

Two Worlds, One Purpose

Sitar Structure

Taraf sympathetic strings, large tumba resonator, curved neck with movable frets

Veena Structure

Dandi fingerboard, tala bridge, resonant body carved from jackwood

Sitar Playing

Expressive meend, resonant drone, fluid glides between notes

Veena Playing

Precise gamakas, rhythmic patterns, intricate ornamentation

Made with GAMMA

Musical Architecture

Sympathetic Strings

11–13 taraf strings vibrate sympathetically, creating rich resonance

Tumba Resonator

Oblong gourd body amplifies sound with warm, mellow tonal quality

Movable Frets

20–25 frets can be adjusted for different ragas and tuning systems

Made with GAMMA

Expressive Voices

Sitar

Known for its expressive, flowing meend that glides seamlessly between notes. The sympathetic strings create a shimmering halo of sound around each note, evoking deep emotion and contemplative mood.

Veena

Renowned for precise gamakas that ornament each note with rhythmic vitality. The fixed frets ensure perfect intonation whilst allowing intricate variations in pitch and volume for dramatic expression.
